

EXCELLENT WEBSITES!

ONLINE PRESENCE

Promote Your Business On The Web

www.karenwebs.com

Who We Are

Karen Webs© is a web design and development business based in Nyeri, Kenya. Our professional services include creating websites, upgrading websites, as well as website maintenance.

If you are looking for a web designer to transform your idea into a successful business website or web application, Karen Webs is well equipped to provide a suitable solution for you.

We love to empower our clients with the web solutions they need to have a thriving online presence.

What Our Customers Say

"Karen Webs goes the extra mile, above and beyond the call of duty to deliver results. If the passion and zest exhibited in the accomplishment of these results is anything to go by, sooner than sooner, Karen Webs will become a household name in matters of web development. If you are thinking of building a website or revamping one, wonder no further. Get in contact with George at Karen Webs and the rest will fall into place."

Our Business Process

Once you choose us to work on your project, we have in place a productive project management process that ensures we deliver exactly what you expect by keeping you on board throughout the project development. The project is divided into the following 4 phases.

PHASE 1

The first step is to comprehensively discuss your project idea and to identify the outcomes you expect once the project is complete.

PHASE 2

The second step is to gather the content (information, pictures, videos, et cetera) that you want us to use in your project, which we then utilize to create the first draft for your inspection, review, and approval.

PHASE 3

We present you with the polished project, we test it, and we also orient you or your delegated person on how to manage your web application as the administrator.

PHASE 4

Finally, we launch your website and set it up for optimized ranking in search engines and overall optimization.
